Projects	<div><div><div>Employment Management System</div><div>March 2025</div></div><div>A Spring Boot–based REST API application for managing employee information with MySQL integration.<div><div></div>https://github.com/Haribaskargitip</div></div><div>Developed a robust Employment Management System using Spring Boot, implementing RESTful APIs for employee data management. Designed an optimized MySQL database schema for reliable data storage and performed thorough API testing using Postman. Ensured proper handling of HTTP status codes, custom error messages, and logging for debugging. Followed Agile practices, contributed to sprint tasks, and maintained clean, reusable, and scalable code.</div></div> <div><div><div>Student Management System</div><div>March 2025</div></div><div>A full-stack CRUD application developed using Spring MVC, Hibernate, and MySQL to manage student records efficiently.<div><div></div>https://github.com/Haribaskargitip</div></div><div>Developed a full-stack Student Management System with Spring MVC and Hibernate for backend logic and database integration. Designed and normalized MySQL database schema using Hibernate annotations. Implemented CRUD operations, MVC architecture, input validation, and exception handling. Ensured clean, reusable, and maintainable code while performing API and functional testing using Postman and JUnit.</div></div>
