SUMMARY

Software Developer with hands-on experience in Java, Spring Boot, Spring MVC, Hibernate, MySQL, Oracle SQL/PL-SQL, and RESTful API design, building scalable, production-ready full-stack web applications. Skilled in Object-Oriented Programming (OOP), MVC architecture, microservices fundamentals, database design and query optimization, and the complete Software Development Life Cycle (SDLC) using Agile/Scrum methodologies. Experienced in API development and testing (Postman, JUnit), unit testing, debugging, exception handling, and Git/GitHub version control, with a strong foundation in Data Structures & Algorithms (DSA) and performance tuning. Proficient with AI coding assistants (ChatGPT, Claude, GitHub Copilot, Cursor, Antigravity) to accelerate development, code review, and refactoring. Experienced deploying and hosting applications on cloud platforms including AWS, Railway, and Vercel, with working knowledge of CI/CD pipelines. Strong problem-solving, debugging, and cross-functional collaboration skills, with a proven ability to deliver clean, maintainable, well-documented code in fast-paced team environments.

Core Competencies: Java Development, Spring Boot, Spring MVC, Hibernate ORM, RESTful API Design, Microservices, MVC Architecture, Object-Oriented Programming, SQL & Database Design, Query Optimization, Unit & API Testing, Git/GitHub, Agile/Scrum, SDLC, CI/CD, Cloud Deployment, Full-Stack Web Development, Debugging & Performance Tuning

EXPERIENCE

Software Developer — PJN Technologies Pvt Ltd

Apr 2026 – Present

- Build and maintain Java, Spring Boot, and REST API-based backend applications following Agile/Scrum practices.
- Develop RESTful/JSON APIs, implement CRUD operations, and integrate with MySQL/relational databases.
- Write clean, maintainable code following OOP principles; perform unit/API testing (Postman, JUnit), debugging, and exception handling.
- Collaborate with cross-functional teams (QA, DevOps, product) during sprint planning and code reviews; use Git/GitHub for version control.
- Use AI coding assistants (GitHub Copilot, Claude, ChatGPT, Cursor) to speed up boilerplate generation, refactoring, and code review.

Intern — Aspire Systems (India) Pvt Ltd

Apr 2025 – Jul 2025

- Collaborated with cross-functional teams in Agile environments to solve real-world coding problems and deliver software utility solutions.
- Debugged backend issues and tested REST APIs using Postman and logging tools, contributing to software testing and QA activities.
- Improved code quality through consistent unit testing and exception handling, following industry coding standards.
- Documented solutions and participated in sprint planning and code reviews, contributing to team performance metrics.

SKILLS

Programming Languages: Java, Core Java, PHP, Object-Oriented Programming (OOP: classes, objects, inheritance, interfaces, polymorphism)

Frameworks & Architecture: Spring Boot, Spring MVC, Hibernate ORM, Laravel, Laravel Eloquent ORM, MVC Architecture, Middleware, Routing, Authentication & Authorization, Microservices (basic)

Web Services & APIs: RESTful API design, REST APIs, JSON APIs, HTTP methods (GET/POST/PUT/DELETE), JWT/Sanctum/Passport auth (basic), API testing, Postman

Core Concepts & Testing: Data Structures & Algorithms (DSA), CRUD operations, Exception & Error Handling, SDLC, Agile/Scrum, Unit Testing, JUnit, Debugging, Code Review

Web Technologies: HTML5, CSS, JavaScript basics, JSP, Servlet

Database & PL/SQL: MySQL, Oracle SQL, PL/SQL, Stored Procedures, Triggers, Functions, Views, Joins, Indexes, Query Optimization, Performance Tuning

Tools, IDEs & Version Control: Eclipse, IntelliJ IDEA, VS Code, Git, GitHub, Maven, Postman, CI/CD awareness

AI Coding Assistants: ChatGPT, Claude, GitHub Copilot, Cursor, Antigravity

Deployment & Cloud: Railway (backend/API deployment, environment variables, service provisioning), Vercel (frontend/full-stack deployment, CI/CD from GitHub, preview deployments), AWS basics (EC2, S3, IAM concepts)

EDUCATION

KMG College of Arts & Science — Computer Science

Tamil Nadu State Board — HSC

PROJECTS

HERBOMEAL-D — Advanced Herbal Nutrition Web Portal

Developed a premium, responsive, multi-lingual front-end web portal (English, Spanish, Arabic, French, Hindi, German) for a herbal nutrition brand, including a custom client-side internationalization (i18n) engine, automatic RTL layout switching for Arabic, a responsive UI/UX design, an interactive product showcase, video-based preparation walkthroughs, and a partner/contact enquiry form. Built with HTML5, CSS3, JavaScript (ES6+), and Tailwind CSS, following responsive web design and cross-browser compatibility best practices.

herbomeal-d.com

Employment Management System

Built with Java, Spring Boot, and RESTful APIs for employee data management. Designed an optimized MySQL schema, tested APIs with Postman, and handled HTTP status codes and logging for debugging. Followed Agile practices with clean, reusable code.

github.com/Haribaskargitip

CERTIFICATIONS

- Java Full Stack Development Course — JSpiders
- Accenture Australia – Technology Consulting Job Simulation (Forage) — Forage
- Trainee – Aspire Systems (India) Pvt Ltd — Aspire Systems

LANGUAGES

English: Good communication skills in speaking, reading, and writing

Tamil: Native/Fluent speaking, reading, and writing ability

Kannada: Basic understanding with simple communication ability
